DETAILED ACTION

Applicants' arguments, filed 3/28/05, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

NEW MATTER

Claims 13-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 13 has been amended to indicate that a "pair" of conductive elements are linked to the active core. Applicants have not pointed to any written support as filed for pairing of conductive elements. Consideration of the instant disclosure as filed also has failed to reveal such a "pair" disclosure which therefore is NEW MATTER. This rejection is necessitated by amendment and applied to dependent claims due to their dependence directly or indirectly from claim 13.

VAGUENESS AND INDEFINITENESS

Claims 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1631

P-bridges and H-bonds are now cited in claim 13 which causes the claim and those dependent therefrom to be vague and indefinite as to what is meant thereby. It may be approximated that P-bridges are phosphate linkages and H-bonds are Hydrogen bonds, however, this is conjecture and therefore is not clear and concise as required by 35 USC 112, second paragraph. Alternatively and confusingly bridges and bonds that facilitate a transistor type of function may be characterized by electron functions that are not the normal phosphate or hydrogen bonding which is not clarified therefore as to what exactly P-bridges and H-bonds are in the context of the instant claims. Clarification via clearer claim wording is requested. This rejection is necessitated by amendment.

PRIOR ART

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13, 16, 17, 30-33, and 36 are rejected under 35 U.S.C. 102(e)(2) as being clearly anticipated by Braun et al. (WO 99/04440).

This rejection is maintained and reiterated from the previous office action, mailed 9/23/04, and as necessitated by amendment regarding the above cited new claims.

Applicants argue that fails to teach or suggest the DNA material as being itself active

Art Unit: 1631

device material. In response, Figure 6 was pointed to in the previous office action, mailed 7/29/03, wherein this reference was first applied as well as supporting discussion on page 30, line 9, through page 31, line 15, as well as page 16, lines 4-10, and page 5, lines 5-9. Clearly the page 30 citation describes single electron transistor elements as oligonucleotides of DNA as on pages 16 and 5 which actively are conductive and thus active elements, contrary to applicants' argument. Additionally, networks of such transistors etc. are disclosed in Braun et al. in the Figures therein which anticipates instant claim 36.

CLAIM OBJECTIONS

Claims 34 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1631

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the Central PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The Central PTO Fax Center number is (571) 273-8300.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ardin Marschel, Ph.D., AU 1631 Supervisory Patent Examiner, whose telephone number is (571) 272-0718. The examiner can normally be reached on Monday-Friday from 8 A.M. to 4 P.M.

Any inquiry of a general nature or relating to the status of this application should be directed to Legal Instrument Examiner, Tina Plunkett, whose telephone number is (571) 272-0549.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
